

How & where do doctors learn?

Multiple methods of learning emphasize the importance of not restricting allocation of credit to a few methods

“Well, *www.what’swrongwithme?.com* says it’s just a virus, but I came to you for a second opinion.”

“Lectures should not be forgotten”

**What are the obstacles to
EPS in the workplace?**

**EPS should not be confused
with health care
management and quality
improvement**

Is Team learning effective?

“**Research on cooperative learning** is one of the greatest success stories in the history of educational research. the amount and quality of that research greatly accelerated in the early 1970s and continues unabated today, a quarter-century later”.

**Slavin RE: Contemporary Educational Psychology
21, 43–69 (1996)**

**Mentors & leaders are
essential**

**The way we are taught in
undergraduate education**

**EPS is easier to introduce in
primary care**

**Who will pay the extra
costs?**
